**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,407,363 to Dunskey et al in view of USPN 6,229,114 to Andrews et al and in view of USPN 6,706,998 to Cutler. Substantial limitations are shown by Dunskey et al (Figure 2) comprising beam directing reflectors 50, 52, and 54, flexible mirror 56 and turn mirror 58, and comprising fast positioner 60 comprising elements such as galvanometer mirrors. Figure 21 of Dunskey et al shows a hole drilling sequence. Dunskey et al do not describe the x and y scanning mirrors. Andrews et al show (Figure 8) the use of x and y scanning mirrors. Cutler describes (Abstract) a fast steering

Art Unit: 1725

mirror. Substitution of a fast steering mirror as a second deflection unit and of a first scanning mirror in place of the flexible and turn mirrors described by Dunskey et al would have been obvious at the time applicant's invention was made to a person of ordinary skill in the art because both types of mirrors provide positioning control during laser beam operation. The use of multiple movable mirrors in place of one mirror for increasing the movement speed would have been obvious at the time applicant's invention was made to a person of ordinary skill in the art because the multiple reflections reduce the range of motion of a single mirror required.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection. Applicant's submission of the fast steering laser micromachining system to Cutler is the basis of the new grounds of rejection.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, motivation is further found in the base reference to Dunskey et al (column 5 last paragraph through

Art Unit: 1725

column 6, line 34) in which reference is made to beam positioning details described by Cutler et al.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
